

Jeshwanth Basutkar

DATA SCIENCE AND MACHINE LEARNING PRACTITIONER

+91-8247222199 — jeshwanthbasutkar@gmail.com — linkedin.com/in/jeshwanth-basutkar —
github.com/Jeshwanth2 — Hyderabad, Telangana, India

1. CONTACT INFORMATION

- **Phone:** +91-8247222199
- **Email:** jeshwanthbasutkar@gmail.com
- **LinkedIn:** linkedin.com/in/jeshwanth-basutkar
- **GitHub:** github.com/Jeshwanth2
- **Location:** Hyderabad, Telangana, India

2. PROFESSIONAL SUMMARY

Data Science and Machine Learning practitioner specializing in Deep Learning and Natural Language Processing. Experienced in building end-to-end ML pipelines including CNN-based text classification systems and AI-driven productivity applications, with a strong foundation in statistics, feature engineering, and model optimization.

3. TECHNICAL SKILLS

Programming	: Python, SQL
Machine Learning Algorithms	: Linear Regression, Logistic Regression, Decision Trees, Random Forest, K-Means Clustering, Naive Bayes
Deep Learning	: Convolutional Neural Networks (CNN), Artificial Neural Networks (ANN), TensorFlow, Keras
Data Analysis & Visualization	: NumPy, Pandas, Matplotlib, Seaborn
Natural Language Processing	: Text Preprocessing, Tokenization, Stop-word Removal, Vectorization, Feature Extraction
Tools & Platforms	: Scikit-learn, Jupyter Notebook, Google Colab, Git, GitHub
Core Concepts	: Statistics, Probability, Feature Engineering, Model Evaluation (Accuracy, Precision, Recall, F1-score), Data Structures & Algorithms

4. PROJECTS (MOST IMPORTANT)

1. Fake News Detection Using CNN

- Developed a deep learning model utilizing Convolutional Neural Networks to classify and verify text articles, implementing a complete NLP pipeline for automated detection.
- **Technologies Used:** Python, TensorFlow, Keras, NumPy, Pandas, Scikit-learn
- **GitHub:** github.com/Jeshwanth2/fake-news-detection

2. Jellyfish Species Identification from Underwater Images

- Built an image classification system using computer vision techniques to identify and categorize various jellyfish species from complex underwater visual data.
- **Technologies Used:** Python, OpenCV, TensorFlow, Convolutional Neural Networks, Matplotlib
- **GitHub:** github.com/Jeshwanth2/jellyfish-identification

5. INTERNSHIP / EXPERIENCE

Data Analytics Intern

ElevateLabs

June 2026 – July 2026

Remote

- Performed data cleaning, exploratory data analysis, and generated actionable insights using analytical tools.
- Collaborated on building data pipelines and visualization dashboards to support business decision-making.

Artificial Intelligence Intern

GlowLogics Solution

Aug 2025 - Oct 2026

Remote

- Worked on applied artificial intelligence tasks and model experimentation.
- Contributed to data-driven decision systems and algorithm optimization.

6. EDUCATION

Bachelor's Degree in Computer Science and Engineering (Ongoing)

Kommuri Pratap Reddy Institute of Technology

2022–2026

CGPA: –

7. CERTIFICATIONS

- Data Science – IBM
- Data Visualization – IBM
- Data Analysis – IBM
- Data Science – GlowLogics Solution
- Artificial Intelligence – GlowLogics Solution
- Artificial Intelligence Intern – GlowLogics Solution
- Explore Data for Data Science – Microsoft Fabric
- Introduction to end to end analysis – Microsoft Fabric

8. ACHIEVEMENTS

- Specialized in Deep Learning and Natural Language Processing projects.
- Built end-to-end ML pipelines including CNN-based text classification systems.
- Strong foundation in statistics, feature engineering, and model optimization.

9. CODING PROFILES

GitHub: github.com/Jeshwanth2 — LinkedIn: linkedin.com/in/jeshwanth-basutkar
